New Admits Declaring a Major

SF State freshmen admits must declare a major by the time they complete 70 units; students who enter SF State as junior- or senior-level transfer students must declare a major by the end of their first semester of enrollment at SF State. Students who do not declare their major will no longer be granted priority in Gator Reg.

NOTE: Biology is an impacted program. Freshman who wish to become Biology majors must be admitted as “Undeclared with an Interest in Biology.” Freshman who are Undeclared with an Interest in Biology should apply to change their major to their target Biology Major by November 1 in their Sophomore year.

New Requirements Beginning Spring 2011

• Impacted Majors - Both lower and upper division students requesting a change of major to an impacted program must meet the supplemental requirements required for that major. Requests to declare impacted majors must be received by the end of the initial filing period for the term for which new majors are being accepted. Continuing students who have earned 96 units or more may not apply to an impacted major (Biology).

NOTE: Apply to become a Biology major by November 1 of the Fall semester (decision is made in Spring semester, for advancement into Biology program in following Fall semester)
