Job-Specific Safety Training for Employees Working with Hazardous Materials

Recall Exercise

1. True   False  My department safety coordinator is the department stockroom manager.  
(except Mathematics/Computer Science/Psychology/Geography departments w/o stockrooms)

2. True   False  When a room has a fire extinguisher, it is usually mounted near the exit door

3. True   False  In an emergency, I should call 911 from a campus phone or 415.338.7200 from my cell phone

4. True   False  I can find copies of written documents such as the Injury & Illness Prevention Program and Hazard Communication Program in the stockroom or department office.

5. True   False  When the building alarm sounds, continue working until someone tells you to leave.

6. True   False  In a lab or workshop, all containers must have an identifying label, even distilled water and soap

7. True   False  When using a fume hood, the sash should be as high as possible both to allow enough air to flow into the hood and to see the work being done more clearly

8. True   False  Hazardous waste may be stored in a satellite accumulation area (SAA) until it evaporates; someone finds it and takes it to the stockroom; pours it into the drain or trash.

9. True   False  To prevent eye strain, it is good practice to look away periodically from your computer monitor or microscope so the eyes can rest.

10. True   False  A Safety Data Sheet (SDS) for a chemical or product describes its hazards, physical properties, incompatible chemicals, and storage recommendations.

11. Which of these do NOT have to be filled in on the hazardous waste ID tag by the generator of the waste?
   a. Accumulation start date
   b. Generator name and location
   c. Description of waste components
   d. Hazardous properties
   e. Waste ID number

12. True   False  If you are not sure of the hazardous properties of your waste, just circle all the choices on the tag.

13. True   False  The waste ID tag is not that important because the waste contractor doesn't look at it anyway.

14. True   False  Wash your hands and change gloves often to prevent over-exposure through skin contact.

15. Exercise: Find the Safety Data Sheet (SDS) for **Sigma-Aldrich 80% Ethanol solution**.  
I found the SDS in this location  

   Fill in the blank
